Printed in Great Britain

Contents of Volume 117

Number 1, 7 November 1985

ROBERTSON, D. S., A Possible Technique for Isolating Genic DNA for Quantitative Traits in Plants 1

STARR, C. K., What if Workers in Social Hymenoptera *Were* Males? 11

SHINDYALOV, I. N. and KOLCHANOV, N. A., Analysis of the Factors and Implications of an Empirical Method for Estimating the Stability of Mutant Human Haemoglobins 19

RAYNER, J. M. V., Bounding and Undulating Flight in Birds . 47

GOODWIN, B. C. and TRAINOR, L. E. H., Tip and Whorl Morphogenesis in *Acetabularia* by Calcium-Regulated Strain Fields 79

CHELA-FLORES, J., Evolution as a Collective Phenomenon . . 107

MÜLLER, U. R. and FITCH, W. M., The Biological Significance of G-T/G-U Mispairing in Nucleic Acid Secondary Structure . 119

ALMAGOR, H., Nucleotide Distribution and the Recognition of Coding Regions in DNA Sequences: an Information Theory Approach 127

KOCH, A. L. and DOYLE, R. J., Inside-to-outside Growth and Turnover of the Wall of Gram-positive Rods 137

LETTER TO THE EDITOR

PAHOR, S., Plant Ecology Models 159

Number 2, 21 November 1985

STRANDBERG, M. W. P., Isomorphism on a Physical System of the Hodgkin-Huxley Equations for Potassium Conductance . 161

SCHWEMMLER, W., Possible Transitions from Molecules to Cells 187

LANDE, R. and ARNOLD, S. J., Evolution of Mating Preference and Sexual Dimorphism 651

BERNSTEIN, H., BYERLY, H. C., HOPE, F. A. and MICHOD, R. E., Sex and the Emergence of Species 665

JØNSSON, V., Comparison and Definition of Spleen and Lymph Node: A Phylogenetic Analysis 691

Index to Volume 117

Acceptor undergoing indefinite self-association, the binding of a ligand to, 597
Acetabularia, tip and whorl morphogenesis by calcium-regulated strain fields, 79
Active site, the exchange of energy between the medium and, 609
ADLER, D., WONG, A. Y. K. and MAHLER, Y., Model of mechanical alternans in the mammalian myocardium, 563
Alamethicin conductance in bilayer membranes, a three state model, 265
ALMAGOR, H., Nucleotide distribution and the recognition of coding regions in DNA sequences: an information theory approach, 127
Alternans, mechanical, in the mammalian myocardium, model of, 563
Animal orientation, theoretical studies; directional displacement in kineses, 337
Antigen recognition by T lymphocytes, an induced fit hypothesis; a role for specific antigen retention structures on antigen-presenting cells, 417
Amplification, attenuation and inversion effects; subunit coupling and kinetic co-operativity of polymeric enzymes, 633
ARNOLD, S. J. (see LANDE, R.), 651
Arthropods, estimating the ends of the sensitive period for photoperiodically induced diapause in, 319
Avian retina, the origin of the observed distribution of toponymic substance (TOP) in, 453
Axiomatization of evolutionary theory, on an, 529

Bacterial surface exclusion against incompatible plasmids, evolution of, 431
BERNSTEIN, H., BYERLY, H. C., HOPE, F. A. and MICHOD, R. E., Sex and the emergence of species, 665
Bilayer membranes, a three state model for alamethicin conductance in, 265
Binding of a ligand to an acceptor undergoing indefinite self-association, 598
Biogenesis, on the role of complementarity in; a critical phenomenon approach, 303
Biological significance of G-T/G-U mispairing in nucleic acid secondary structure, 119
Bioreactor, the organism as; interpretation of the reduction law of metabolism in terms of heterogeneous catalysis and fractal structure, 209
Birds, bounding and undulating flight in, 47
Bovine pancreatic trypsin inhibitor β-sheet NH's, the electrostatic effect of trypsin binding on the hydrogen exchange rate of, 505
BREMERMANN, H. J. and FIEDLER, B., On the stability of polymeric host-pathogen populations, 621
BRUNER, L. J., A three state model for alamethicin conductance in bilayer membranes, 265
BYERLY, H. C. (see BERNSTEIN, H.), 665

Calcium-regulated strain fields, tip and whorl morphogenesis in *Acetabularia* by, 79
Ca^{2+}-ATPase and $Na^+ + K^+$-ATPase, kinetic analysis of enzyme inactivation as applied to the covalent modifications of, 397

Catalysis, heterogeneous, and fractal structure, interpretation of the reduction law of metabolism in terms of; the organism as bioreactor, 209
Cells, antigen-presenting, a role for specific antigen retention structures on; an induced fit hypothesis for antigen recognition by T lymphocytes, 417
Cells, mammalian, radiosensitive and radioresistant, nuclear volume and chromatin organization in, 587
Cells, possible transitions from molecules to, 187
CHELA-FLORES, J., Evolution as a collective phenomenon, 107
Chromatin organization and nuclear volume in some radiosensitive and radioresistant mammalian cells, 587
Coding regions in DNA sequences, nucleotide distribution and the recognition of; an information theory approach, 127
Collective phenomenon, evolution as, 107
Complementarity, role in biogenesis; a critical phenomenon approach, 303
Conductance, alamethicin, in bilayer membranes, a three state model for, 265
Conductance, ion, in nerve, homomorphism on a physical system of the Hodgkin-Huxley equations for, 509
Conductance, potassium, isomorphism on a physical system of the Hodgkin-Huxley equations for, 161
Conductance, sodium, isomorphism on a physical system of the Hodgkin-Huxley equations for; toxin allosteric effects and gating currents, 385
Critical phenomenon approach to the role of complementarity in biogenesis, 303

Darwinism, molecular, an organismic critique, 545
Diapause, photoperiodically induced, in arthropods, estimating the ends of the sensitive period for, 319
DNA, genic, for quantitative traits in plants, a possible technique for isolation of, 1
DNA sequences, nucleotide distribution and the recognition of coding regions in; an information theory approach, 127
Dominance: the significance of over- and underdominance for the maintenance of genetic polymorphisms. Underdominance and stability, 493
DOUCET, P. G. and DROST, N. J., Theoretical studies on animal orientation II. Directional displacement in kineses, 337
DOYLE, R. J. (see KOCH, A. L.), 137
DROST, N. J. (see DOUCET, P. G.), 337

Ecology models, plant (letter), 159
Electrostatic effect of trypsin binding on the hydrogen exchange rate of bovine pancreatic trypsin inhibitor β-sheet NH's, 505
Energy exchange between the medium and the active site, 609
ENGEN, S. and SÆTHER, B-E., The evolutionary significance of sexual selection, 277
Enzyme inactivation, kinetic analysis of, as applied to the covalent modifications of $Na^+ + K^+$-ATPase and Ca^{2+}-ATPase, 397
Enzymes, polymeric, subunit coupling and kinetic co-operativity of; amplification, attenuation and inversion effects, 633
Evolution of bacterial surface exclusion against incompatible plasmids, 431
Evolution as a collective phenomenon, 107
Evolution of mating preference and sexual dimorphism, 651

Evolutionary significance of sexual selection, 277
Evolutionary theory, on an axiomatization of, 529
Evolutionary theory, thermodynamics and the conceptual structure of, 363

F-actin, thermal torsion of, 489
FERREIRA, R. and TSALLIS, C., On the role of complementarity in biogenesis: a critical phenomenon approach, 303
FERRER, F. (see JOU, D.), 471
FIEDLER, B. (see BREMERMANN, H. J.), 621
FITCH, W. M. (see MÜLLER, U. R.), 119
Flight, bounding and undulating, in birds, 47
Foraging, optimal, and learning, 231
Fractal structure, interpretation of the reduction law of metabolism in terms of heterogeneous catalysis and; the organism as bioreactor, 209
FRITZSCH, G. K., A kinetic analysis of enzyme inactivation as applied to the covalent modifications of $Na^+ + K^+$-ATPase and Ca^{2+}-ATPase, 397

Game of the pentose phosphate cycle, 251
Game theory, mutations, mixed strategies and, 291
Gating currents and toxin allosteric effects; isomorphism on a physical system of the Hodgkin-Huxley equations for sodium conductance, 385
GELLÉRI, B. (see SERNETZ, M.), 209
Genetic polymorphisms, the significance of over- and underdominance for the maintenance of; underdominance and stability, 493
GOODWIN, B. C. and TRAINOR, L. E. H., Tip and whorl morphogenesis in *Acetabularia* by calcium-regulated strain fields, 79
Gram-positive rods, inside-to-outside growth and turnover of the wall of, 137
GREENE, P. R., Thermal torsion of F-actin, 489
GREGORIUS, H.-R. (see ZIEHE, M.), 493
Growth, inside-to-outside, and turnover of the wall of Gram-positive rods, 137
Growth of trees, models for; derivations employing the pipe-model theory, 579
G-T/G-U mispairing in nucleic acid secondary structure, biological significance of, 119

Haemoglobins, human, mutant, factors and implications of an empirical method for estimating the stability of, 19
HAMMOND, B. J., On the origin of the observed distribution of toponymic substance (TOP) in avian retina, 453
HIGAZI, A., The exchange of energy between the medium and the active site, 609
Hodgkin-Huxley equations for ion conductance in nerve, homomorphism on a physical system of, 509
Hodgkin-Huxley equations for potassium conductance, isomorphism on a physical system of, 161
Hodgkin-Huxley equations for sodium conductance, isomorphism on a physical system of; toxin allosteric effects and gating currents, 385
HOFFMANN, J. (see SERNETZ, M.), 209
Homomorphism on a physical system of the Hodgkin-Huxley equations for ion conductance in nerve, 509
HOPE, F. A. (see BERNSTEIN, H.), 665

Host-pathogen populations, polymorphic, stability of, 621
HOUSTON, A. I. (see MCNAMARA, J. M.), 231
Human mutant haemoglobins, factors and implications of an empirical method for estimating the stability of, 19
Hydrogen exchange rate of bovine pancreatic trypsin inhibitor β-sheet NH's, the electrostatic effect of trypsin binding on, 505
Hymenoptera, social, what if workers *were* males?, 11

Ion conductance in nerve, homomorphism on a physical system of the Hodgkin-Huxley equations for, 509
ISIDORO, A. (see MELÉNDEZ-HEVIA, E.), 251
Isomorphism on a physical system of the Hodgkin-Huxley equations for potassium conductance, 161
Isomorphism on a physical system of the Hodgkin-Huxley equations for sodium conductance: toxin allosteric effects and gating currents, 385

JONGELING, T. B., On an axiomatization of evolutionary theory, 529
JØNSSON, V., Comparison and definition of spleen and lymph node: a phylogenetic analysis, 691
JOU, D. and FERRER, F., A simple nonequilibrium thermodynamic description of some inhibitors of oxidative phosphorylation, 471

Kineses, directional displacement in; theoretical studies in animal orientation, 337
Kinetic analysis of enzyme inactivation as applied to the covalent modifications of $Na^+ + K^+$-ATPase and Ca^{2+}-ATPase, 397
Kinetic co-operativity of polymeric enzymes, subunit coupling and; amplification, attenuation and inversion effects, 633
